Access # _____

What is the focus of this search? Please include concepts, synonyms etc.

Attach a copy of the abstract, pertinent claims and your East search strategy. Thanks.

The general idea is computerized customization of motor oil. You enter info about what kind of motor vehicle you're using, what the environmental conditions are, etc., and a computer analyzes this and recommends a particular motor oil for you. This may involve custom-manufacturing a motor oil by adding particular additives to a baseline motor oil.

Some keywords: Motor oil, engine oil, lubricant, custom, customiz?, personaliz?, individualiz?, recommend?, temperature, weather, antioxidant, performance, blend, additive, etc.

Feel free to call or e-mail me with questions, suggested search strategies, etc.
